

Evaluation: Early results from the PMH Assessment

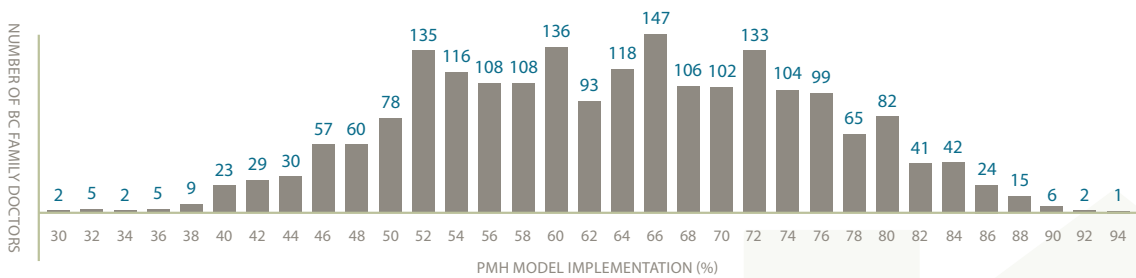

The PMH Assessment is an electronic assessment that highlights practice strengths and opportunities in relation to the 12 attributes of a patient medical home in BC.

As of August 2019, 34% (2,086) of family doctors in the province completed the assessment since it was introduced in 2017. Results can support the development of quality improvement activities within practices, and will be able to support community planning efforts.
